365 Protect Plans
Must-have companion to M365

Businesses rely on Microsoft 365 to help their employees work and collaborate, but increased productivity can come at the cost of increased risk. To protect your investments, you need to take a layered security approach. The Mimecast 365 Protect Plans provide business-critical, AI-powered supplemental security to Microsoft 365, delivering a layer of protection that defends against highly sophisticated attacks. Over 27,000 customers choose Mimecast to enhance cloud email security, defend against disruption, ensure data is never lost, and protect their investment in Microsoft.

Mimecast 365 Plan includes

Email Security
Improve M365 email security efficacy, protecting the #1 threat vector from attacks including business email compromise, ransomware, and phishing.

Browser Isolation
Integrated, agnostic Browser Isolation providing 100% protection for advanced web threats delivered via email covering all browsers and devices, not just Edge.

CyberGraph™
A.I. behavioral analysis and dynamic bannering understands your users to intelligently augment security with anomaly detection.

Internal Email Protect
Advanced detection applied to all email traffic extends security to internal and outbound email to identify compromise and reduce impact for you and your supply chain.

Simple and rapid remediation automates remediation with a single dashboard with no PowerShell required for manual intervention.

Mimecast Extensible Security Hooks
Share intelligence across your ecosystem with 100+ APIs & integrations into top security vendors.

Mimecast 365 Plan + PLUS

includes everything in Mimecast 365 Protect plus...

Email Continuity
Maintain 100% email uptime to keep your #1 communication tool available even when Microsoft is not with integrated applications and event management.

Sync and Recover
Fast, easy data restoration makes it easy to recover from data loss and corruption from a secure and independent source.

World-class email security. Optimized M365 protections. Effortless deployment.

Recommended Add-Ons

DMARC Analyzer
Increase visibility and governance over your domains with easy-to-use reporting and analysis of who is sending email on your behalf to identify legitimate versus fraudulent senders.

Awareness Training
Engage your employees in security with micro-learning modules and phishing simulations.

Brand Exploit Protect
Identify and take down brand attacks before they happen, and augment security with web domain intelligence.

Cloud Archive
Simplify long-term data management, compliance, e-Discovery, and case review.

"Should we have Mimecast and Microsoft 365? Microsoft is a best of suite product – they're pretty good at most things. Where Mimecast is a best of breed, they invest in cybersecurity, and we layer Mimecast in front of Microsoft Office 365."

Andrew Pritchett, CISO
Grant Thornton
